PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on project experience in SQL, Python, Pandas, NumPy, Excel, and Power BI. Skilled in data cleaning, data validation, exploratory data analysis, SQL querying, and interactive dashboard development. Experienced in analyzing customer behavior, restaurant data, banking databases, and historical cybersecurity trends to identify patterns and communicate data-driven insights. Seeking an entry-level Data Analyst opportunity to support business reporting and data-driven decision-making.

EDUCATION

Malla Reddy College of Engineering, Hyderabad 2023 – 2026
Bachelor of Technology in Computer Science and Engineering
CGPA: 8.0/10

SKILLS

Programming: Python
Databases: SQL, MySQL, PostgreSQL
Data Analytics: Pandas, NumPy, Data Cleaning, Data Validation, EDA
Data Visualization: Power BI, Microsoft Excel
Tools: Jupyter Notebook, MS PowerPoint, MS Word

INTERNSHIP EXPERIENCE

Python Intern – Infosys Springboard Dec 2025 – Feb 2026

- Developed a Python-based application to analyze resumes and recommend suitable job roles based on candidate skills.
- Extracted resume information to identify relevant skills, highlight skill gaps, and organize candidate details for analysis.
- Presented resume scores, skill gaps, job recommendations through a dashboard to communicate results in a clear format.

PROJECTS

Customer Shopping Behavior Analysis

- Analyzed 3,900 shopping records to identify customer purchasing patterns and summarize useful business insights.
- Cleaned and validated shopping data to handle missing values, improve data consistency, and maintain accurate records.
- Created a Power BI dashboard to visualize customer preferences, purchasing, and shopping behavior for business insights.

Zomato Data Analysis

- Analyzed restaurant data to identify ratings, restaurant categories, customer preferences, and useful business insights.
- Cleaned and validated restaurant records to handle missing values, consistency, and maintain accurate information.
- Created visual reports to summarize restaurant ratings, online ordering trends, and cost patterns for clear interpretation.

Banking Management System

- Designed a MySQL database to organize customer, branch, account, employee, loan, and transaction records accurately.
- Used SQL queries and joins to retrieve banking information, analyze records, and maintain consistency to related tables.
- Applied aggregate functions, subqueries, and stored procedures to support structured information and data management.

Modeling and Predicting Cyber Hacking Breaches

- Analyzed cybersecurity breach data spanning 2005–2017 to examine changes in breach frequency and incident size.
- Studied historical patterns and trends to understand changes in hacking incidents over time.
- Presented analytical findings through charts and visualizations to communicate cybersecurity trends.

CERTIFICATIONS

- Deloitte – Data Analytics Job Simulation (Forage)
- Power BI Workshop – Office Master
- Career Edge – Young Professional Program, TCS iON
- Infosys Springboard – Virtual Internship
